SUMMARY

Full-Stack MERN Developer with hands-on experience designing, building, and deploying production-grade web applications. Delivered a live food delivery platform and a fully functional e-commerce system featuring Stripe payment integration, JWT authentication, and RESTful APIs. Adept at building responsive UIs with React.js and scalable backends with Node.js and Express. Seeking a placement opportunity to contribute real-world impact, grow within a product-focused team, and continue advancing expertise in modern web technologies.

SKILLS

Languages: PHP, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST API Design, EJS (Server-Side Rendering)

Databases & Cloud: MySQL, MongoDB

Auth & Payments: JWT Authentication, Stripe API

Tools & DevOps: Hostinger, Git, GitHub, VS Code, Render, Vercel

Testing: API Testing (Postman)

EXPERIENCE

Full Stack Developer Intern – BrandFolks | June 2026 – Present

- Contributing to full-stack web application development using React.js, TypeScript, Node.js, Express.js, MongoDB, and related technologies.
- Developing responsive and user-friendly interfaces and integrating frontend components with backend services.
- Working with databases, APIs, authentication, and application functionality as part of hands-on development.
- Collaborating on MediCare Plus, a full-stack Hospital Management System, applying modern web development practices.

MERN Stack Developer Intern – ExpertX | June 2024 – Feb 2025

- Developed ShopEase, a full-stack e-commerce application using HTML, CSS, JavaScript, EJS, Node.js, Express.js, and MongoDB.
- Built Tomato, a full-stack food delivery platform using React.js, Node.js, Express.js, MongoDB, JavaScript, HTML, and CSS, following the MERN stack architecture.
- Implemented RESTful APIs, database operations, server-side functionality, and frontend-backend integration to support core application features.
- Gained hands-on experience with CRUD operations, API integration, MongoDB, Express.js, Node.js, React.js, debugging, and full-stack web application development through project-based learning.

PROJECT

MediCare Plus – Hospital Management System | July 2026

Tech Stack: React.js, Vite, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS

- Engineered with a full-stack Hospital Management System to streamline patient management, doctor workflows, appointments, medical records, and administrative operations.
- Developed role-based authentication and authorization with dedicated dashboards and permissions across 3 user roles (hospital staff, doctors, and administrators).
- Built and integrated RESTful APIs with Express.js and MongoDB/Mongoose for CRUD operations, data validation, and secure healthcare data management.
- Create a scalable React frontend using TypeScript, reusable components, and Tailwind CSS, delivering a responsive experience across desktop, tablet, and mobile devices.

EDUCATION

Bachelor of Computer Applications (BCA)

Bharathidasan University

ACHIEVEMENTS & ACTIVITIES

- Built and deployed a MERN stack application as a personal project
- Actively follow engineering blogs and newsletters (Dev.to, JavaScript Weekly) to stay current with MERN ecosystem updates and best practices.
