+91 9895 410 389 | Kerala, India

SUMMARY

Software Developer with 1+ year of internship experience building and deploying 3 production-grade web applications. Delivered a live food delivery platform, hospital management system and a full e-commerce system featuring Stripe payments, JWT authentication in MERN stack, and 40+ RESTful APIs endpoints. Builds responsive React.js interfaces and scalable Node.js/Express backends. Seeking a full-stack internship or placement to contribute real-world impact within a product-focused team.

EXPERIENCE

Full Stack Developer Intern – BrandFolks | June 2026 – Present

- Built and shipped 10+ full-stack features using React.js, TypeScript, Node.js, Express.js, and MongoDB within a 4-member development team.
- Developed responsive interfaces validated across 3 breakpoints (desktop, tablet, mobile) for consistent rendering on all target devices. Implemented database schemas, REST APIs, and authentication flows, refactoring MongoDB queries with indexing to cut average response time.
- Delivered 5+ core modules of MediCare Plus, a full-stack Hospital Management System, following Git-based collaborative workflows and code review practices.

MERN Stack Developer Intern – ExpertX | June 2024 – Feb 2025

- Developed ShopEase, a full-stack e-commerce app with 6 core modules (auth, catalog, cart, checkout, orders, admin) using JavaScript, EJS, Node.js, Express.js, and MongoDB.
- Built Tomato, a full-stack food delivery platform on the MERN stack, integrating Stripe payments and reducing the checkout flow to 3 steps.
- Implemented 40+ RESTful API endpoints covering CRUD operations, data validation, and frontend-backend integration across both applications.
- Completed 9 months of development across 2 end-to-end projects, gaining production experience in API design, debugging, and deployment.

PROJECT

MediCare Plus – Hospital Management System | July 2026

Tech Stack: React.js, Vite, TypeScript, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS

Links: GitHub Repo URL: github.com/muhammedafthal/HsptlManagementSys.git | Live Demo URL: hsptlmanagementsys-1.onrender.com/

- Engineered a Hospital Management System streamlining 5 core workflows — patient management, doctor scheduling, appointments, medical records, and admin operations.
- Developed role-based authentication and authorization across 3 user roles (hospital staff, doctors, administrators) with dedicated dashboards and 15+ protected routes.
- Built 25+ RESTful APIs endpoints with Express.js and Mongoose for CRUD operations, data validation, and secure healthcare data management.
- Created a scalable React frontend in TypeScript with 20+ reusable Tailwind CSS components, delivering a responsive experience across desktop, tablet, and mobile.

SKILLS

Languages: Python, PHP, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend: Next.js, React.js, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, REST API Design, EJS (Server-Side Rendering)

Databases & Cloud: MySQL, MongoDB, Mongoose

Auth & Payments: JWT Authentication, Stripe API

Cloud & DevOps: Git, GitHub, Cloudflare, Render, Vercel, Hostinger

Tools: Postman, VS Code, PyCharm CE, Claude Code, Antigravity

EDUCATION

Bachelor of Computer Applications (BCA)

Bharathidasan University

ACHIEVEMENTS & ACTIVITIES

- Built and deployed a MERN stack application as a personal project
- Actively follow engineering blogs and newsletters (Dev.to, JavaScript Weekly) to stay current with MERN ecosystem updates and best practices.
